

Taj Eddine Marmoul

Junior AI & Full Stack Engineer | React, FastAPI & LLM Products

Casablanca, Morocco | Email: tajdinetajdine1@gmail.com | Phone: +212 6 64 41 01 96

LinkedIn: linkedin.com/in/tajeddine-marmoul | GitHub: github.com/TajEddineMarmoul

PFE internship at CNRS LAAS, Toulouse | Available October 2026 | Open to remote, relocation, and visa sponsored roles

PROFESSIONAL SUMMARY

Junior AI and full stack engineer building web applications, LLM features, and data systems across React, Next.js, FastAPI, PostgreSQL, and Docker.

EXPERIENCE

AI Platform Engineer Intern

CNRS LAAS, Toulouse, France

February 2026 - Present

- Built an MCP based platform where users describe database, backend, and UI needs, reducing manual back and forth with engineers by turning requests into structured tool calls.
- Worked with FastMCP, FastAPI, React, and MongoDB on a lab platform for internal users, supporting generated forms, app prototypes, and repeatable backend workflows.
- Added validation, audit trails, rate limits, and human review across 5 MCP servers and 75+ tools, and presented the work at J DEV 2026.

BI and Data & DevOps Intern

Royal Air Maroc, Casablanca, Morocco

July 2025 - August 2025

- Built a Dash, PostgreSQL, and Redis dashboard for flight operations data, reduced load time by 60%, and helped deploy web and local versions with Docker, Nginx, and Gunicorn. Link: [RAM dashboard](#).

Unity Game Developer

Studyo, London, United Kingdom

October 2024 - July 2025

- Worked with the Studyo.io team on 7 educational Unity games, building gameplay systems, UI flows, analytics events, and iteration fixes.

Full Stack Developer

L'Cachet, Casablanca, Morocco

January 2024 - Present

- Built a Moroccan legal and administrative RAG product with 9,100+ official documents, 85,000+ embeddings, grounded answers, shared chats, authentication, and 4-language support. Link: [live product](#).
- Implemented [PDF to text extraction](#) for Arabic legal documents and the web product with Next.js, TypeScript, PostgreSQL, Prisma, vector search, Gemini embeddings, and deployment.

AI & Full Stack Intern

1337 Coding School, Khouribga, Morocco

July 2024 - July 2024

- Worked in a 3 developer team on a YOLOv5s and MobileFaceNet security system, trained PyTorch models for 126 GPU hours, and delivered a WebSocket app with role based authentication and live camera events. Link: [camera system](#).

EDUCATION

Master of Engineering in AI & Computer Science

ENSAM Casablanca, Morocco

2023 - Present

Final year engineering student completing a PFE internship at CNRS LAAS, Toulouse.

Preparatory Classes, Mathematics & Physics

CPGE Ibn Abdoun, Khouribga, Morocco

2021 - 2023

SKILLS

AI / Agents: RAG, MCP, tool calling, prompt engineering, LLM APIs

Backend / Data: Python, FastAPI, PostgreSQL, MongoDB, Redis, Prisma, REST APIs

Frontend / Infrastructure: React, Next.js, TypeScript, Docker, Nginx, Linux, TLS

CERTIFICATIONS & LANGUAGES

Certifications: OCI 2025 Data Science; DataCamp Professional Data Analyst (2024)

Languages: Arabic (Native); English (Professional); French (Professional working proficiency)
